## Caso de Estudio

### Academia del Álgebra Relacional. Dr. Edgar F. Codd

La Academia está dividida en Departamentos (Ciencias, Bases de Datos, Matemáticas...). Hay Profesores que sólo dan clases en un departamento (el prof. Chen únicamente da cursos de Bases de Datos, mientras que el prof. Boyce además de Bases de Datos también da cursos de matemáticas.)

Cada alumno puede inscribirse en varios cursos de diferentes departamentos.

Para cada curso, el profesor que lo dicte decide cuál es el libro de texto que se va a usar, y aunque casi siempre hay un consenso, es posible que en el mismo curso, dictado por diferentes profesores, se utilicen libros diferentes.
